

Efforts to mitigate environmental impacts in manufacturing

Toyoshina plant in Japan

Assembled using 100% renewable electricity

Epson announced that its worldwide group sites² will all meet their electricity needs from 100% renewable energy sources (renewable electricity) by 2023. We have achieved 100% renewable energy at our projector's manufacturing site in the Philippines by generating power with a rooftop mega-solar power plant and by switching to a mix of geothermal and hydroelectric power in January 2021.

Epson Precision (Philippines), Inc.

Over 80% recycled cardboard packaging

All carton box packaging of Epson's projectors are made by over 80% recycled cardboard.

ENGINEERED TO CAPTIVATE. DESIGNED TO IMPRESS.

Information correct at time of printing. Printed April 2024

¹ Among Japanese companies that have joined the RE100. Current as of January 9, 2024, per Epson research.
² Excludes some sales sites and leased properties where the amount of electricity consumed cannot be determined
³ GHG (Greenhouse Gas), GHG scope 1, 2, 3 emission
